## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-22, drawn to an unwinding device by using certain elements for coupling and disengaging the central shaft.

Group II, claim(s) 23-36, drawn to a method for unwinding a reel.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature of the Group I invention is the claimed center drive mechanism using certain elements for coupling and disengaging the central shaft and this feature is not present in Group II. Therefore, unity of invention is lacking.
